

Financing for Sustainable Development

Overseas Impact helps firms secure financing – \$500,000 to \$400 million – from the Overseas Private Investment Corporation (OPIC), the U.S. government’s development finance institution. Our transaction advisory services enhance client outcomes and streamline the OPIC loan approval process.

Established in 1971, OPIC provides loans, loan guarantees, and insurance in more than 150 countries worldwide. To date, OPIC has supported more than \$200 billion of investment in over 4,000 projects.

By connecting the private sector to long-term financing from OPIC and offering transaction advisory services, Overseas Impact helps entrepreneurs, businesses, and nonprofits solve the world’s greatest development challenges.

OPIC Financing

OPIC loans are available with terms up to 20 years and amounts up to \$400 million.

OPIC Eligibility

OPIC loans are available to entities pursuing sustainable development projects in lower income countries. OPIC supports projects across a diverse array of sectors, including renewable energy, healthcare, education, housing, hospitality, financial services, and agribusiness. Projects should create local jobs and promote sustainable development in the host country. All projects must have a meaningful U.S. connection – a threshold that can be met by partial U.S. ownership in the project or the involvement of an American business or nonprofit.
